

Product Brief

1. Overview

A minimal personal web-based app store to organize and access all of Vidyadhar's apps in one place.

2. Problem Statement

Vidyadhar's apps are scattered across his links and bookmarks, making it hard to access them in one single view.

3. Target Users

For Vidyadhar and for anyone who wants to access his apps quickly

4. Value Proposition

Access Vidyadhar's apps as services in one place, enabling quick access for both small and complex use cases anytime.

5. Key Features

- Quick launch links (CTAs) for each app
- Simple grid view
- Basic search or tags

6. User Flow

- Open single-page app store
- View all apps in one grid
- Click to launch any app

7. Success Metrics

- Able to access any app within 1–2 clicks
- Reduced time spent searching for app links

8. Constraints & Risks

9. Timeline

- MVP build: 1 day

10. Open Questions

- None for MVP
